### Profile Summary

A highly motivated Software Engineering undergraduate at SLIIT with a strong foundation in full-stack development, microservices architecture, and AI-powered applications. Experienced in building scalable, cloud-native systems using modern technologies such as React, Node.js, Docker, and Kubernetes. Passionate about designing clean, user-centric interfaces with a focus on performance, accessibility, and maintainability. Demonstrates solid problem-solving skills, a keen interest in system design, and hands-on experience integrating AI solutions into real-world applications. Eager to contribute technical expertise and continuously learn in a dynamic software engineering internship environment.

### Education

- BSc. (HONS) in Information Technology June 2023 – 2027  
*Specialization: Software Engineering*  
Sri Lanka Institute of Information Technology (SLIIT), Malabe, Sri Lanka
- G.C.E. Advanced Level Examination Biological Stream 2021  
Chemistry: C, Biology: S, Agriculture: S

### Technical Skills

- JavaScript (ES6+), TypeScript
- Python, C, C++
- React.js, Vite, TailwindCSS
- Node.js, Express.js
- REST API, JWT Auth, RBAC
- MongoDB, PostgreSQL, MySQL
- Docker, Kubernetes
- CI/CD Pipelines
- Nginx, Artillery.io
- Firebase, Vercel, Render
- Git, GitHub
- Google Gemini API
- Figma, Responsive Design
- Wireframing & Prototyping
- Linux

### Projects

- AI-Enabled Smart Healthcare & Telemedicine Platform** ([Link](#))
  - Cloud-native microservices platform with 10+ services, JWT/RBAC auth, real-time video via Jitsi Meet, Stripe payments, and Twilio notifications.
  - AI Symptom Checker for health analysis; fully containerized with Docker Compose and deployed on Kubernetes.
  - Tools:** Node.js, React.js, MongoDB, Docker, Kubernetes, Stripe, Twilio, JWT.

2. **AgriTrace — Food Traceability Platform** [\(Link\)](#)
  - Farm-to-table traceability platform with QR code scanning, batch ID generation, and role-based REST APIs for Farmer, Distributor, Retailer, and Consumer.
  - Full test coverage: Unit, Integration (mongodb-memory-server), and Load tests via Artillery.io; deployed on Vercel and Render.
  - **Tools:** MERN Stack, Vercel, Render, MongoDB Atlas, Artillery.io.
3. **LeafLink — Plant Marketplace** [\(Link\)](#)
  - Full-stack MERN e-commerce platform with JWT auth, Stripe payments, seller & admin dashboards, and Cloudinary image storage.
  - Integrated Google Gemini AI as an intelligent plant care assistant with a responsive, accessible UI.
  - **Tools:** MERN Stack, JWT, Stripe, Cloudinary, Google Gemini API.
4. **AI PDF Content Finder** [\(Link\)](#)
  - Full-stack AI web app that extracts PDF content and answers natural language queries using Google Gemini with database storage.
  - Built a responsive, accessible UI with document history and context-aware responses.
  - **Tools:** React.js, Node.js, Google Gemini API, MongoDB.
5. **Online Laundry Management System** [\(Link\)](#)
  - End-to-end laundry management system with order tracking, staff dashboards, and role-based user management.
  - Designed intuitive workflows covering the full service lifecycle from order placement to delivery.
  - **Tools:** HTML, CSS, JavaScript, PHP, MySQL.
6. **YouCalm Mobile UI Prototype** [\(Link\)](#)
  - Mobile app UI/UX prototype promoting mindfulness and stress relief with calming visuals and intuitive navigation.
  - Created wireframes, interactive prototypes, and a cohesive design system with accessibility-aware, responsive layouts.
  - **Tools:** Figma, Wireframing & Prototyping, Responsive Design.

## Certifications
